# Doric Hudson Patio Door Lock Range

The Hudson slim line patio door lock, was designed by Doric Products Australia Pty Ltd to fulfill the need for an unobtrusive yet functionally secure patio door lock.

The Hudson is manufactured in Polesium™ an engineered reinforced polymer developed by Doric Products Australia that is ideally suited to coastal environments.

## Features:

- Highly resistant to corrosion in aggressive environments.
- Thermally non-conductive
- UV stable
- Structurally strong with good wear resistant properties.
- Able to be painted, plated, or powder coated.

The security and functionality of the Hudson is delivered through the two 304 grade stainless steel tongues which lock securely into a range of Aluminum keepers to suit the door frame type and design.

Latching from the inside is simple and positive by means of a clearly visible centrally located snib which indicates whether the Hudson is in the latched or open position.

The Hudson external handle is available in a range of functional designs to suit various applications and can be ordered with or without lock cylinder and keys.
