Innovators of Hardware for Windows and Doors

Double Hung Sash Lock

The Double Hung Sash Lock includes a choice of purpose keepers to specifically designed to integrate with single and double glazed windows. Incorporating a screw and bushing type pivot assembly. This design will provide years of trouble free operation.

Screw locations have been situated back towards the centre of the windows meeting rails to ensure the best possible fixing on a Double Hung Window.

(DT1)

Sliding Window Lock

This lockable latch has been designed to be surface mounted onto the window. With a functional handle design and complementary keepers, the Sterling Series Sliding Window lock unifies the top of the range windows.

(DT4)

Keyed Casement Fastener

The Sterling Series Casement Fasteners are designed with both function and aesthetics in mind. Their sleek contemporary design does not overlap the glass when in the closed position, further enhancing the view.

All fixing screw locations have been positioned to compliment modern weather seal locations.

(DT3)

Sash Lifts

True to the range, the Sterling Series Sash Lifts reflect consistency in design. Manufactured from stainless steel these premium sash lifts will provide years of functional use.
